

# BRB CM 50

1041177

INCI NAME: Cyclopentasiloxane

Issue date: Jan 2020

## Sales Specifications

| DESCRIPTION                | RESULTS   | UNITS              | SPECIFICATION LIMITS |       |
|----------------------------|---|--------------------|----------------------|-------|
|                            |   |                    | LOW                  | HIGH  |
| Appearance                 |   | Visual             |                      |       |
| Crystal clear fluid        |   |                    |                      |       |
| Free from suspended matter |   |                    |                      |       |
| D5/cyclopentasiloxane      |   | % area             | 96.0                 | 100.0 |
| GC                         |   |                    |                      |       |
| <b>Warranty</b>            | <i>The below properties are warranted to meet the specifications, but BRB International BV does not perform analysis on every batch</i> |                    |                      |       |
| <b>Characteristics:</b>    |   |                    |                      |       |
| Density at 25°C            |   | g/cm <sup>3</sup>  |                      |       |
| 0.950 - 0.960              |   |                    |                      |       |
| Viscosity at 25°C          |   | mm <sup>2</sup> /s |                      |       |
| 3.50 - 4.50                |   |                    |                      |       |
| D4/cyclotetrasiloxane      |   | % area             |                      |       |
| < 0.1                      |   |                    |                      |       |
| GC                         |   |                    |                      |       |
